

PolyGard® Oxygen O₂ Transmitter ADT93 1195

DESCRIPTION

O₂ transmitter including digital measurement value processing and temperature compensation for the continuous monitoring of the oxygen concentration in the ambient air. Comfortable calibration routine with selective access release is integrated in the transmitter. The ADT-93 possesses a standard analog (0) 4- 20 mA or (0) 2– 10 V DC, and an RS-485 interface. 2 relays with adjustable switching thresholds are available as an option.

APPLICATION

For the detection of oxygen in rooms where changes of the oxygen concentration are possible, such as laboratories and food production etc. Due to the standard analog signal and the RS-485 Interface the O₂ transmitter is compatible to the PolyGard series MGC and DGC by MSR-E as well as to any other electronic control or automation system.
